Wednesday 3/30: 9am- Walmart Run (S/U) 3pm-Book Club

March Birthdays

In astrology, those born from March 1–20 are Pisces' Fish. Pisces are sympathetic and selfless, making them compassionate friends. Their intuitive natures also make Fish creative and expressive artists. Those born from March 21–31 are Aries' Rams. As the first sign of the zodiac, Rams love to lead the charge of change and progress. Sometimes impulsive, always passionate, Rams are dynamic and fun friends.

Residents: Ross G. 3/1; Jean H. 3/26

Employees: Judy B. 3/19; Nancy B. 3/20; Omar A. 3/21; Maritza F. 3/23; Nancy C. 3/31

Volunteers: John K. 3/5

Night of the Witches

2

Halloween might be long gone, but Mexico's Night of the Witches is only arriving on the first Friday in March. For centuries, indigenous spiritual beliefs, medieval Spanish

traditions of witchcraft, and West African voodoo practices have mingled and persisted in the town of Catemaco. In 1970, a local shaman proposed the idea of hosting a witchcraft convention known as the Noche de brujas, Night of the Witches. For the past 50 years, hundreds of witches, shamans, and healers from all over Mexico have converged on a hilltop known as Cerro Mono Blanco to participate in a mass cleansing ritual, ridding the town of negative energies and influences. Of course, 50 years is long enough for the spectacle of the event to become commercialized by the masses, and these days, tourists outnumber the witches. It is easy to buy a protective amulet, sit for a tarot reading, and witness an impressive variety of rituals and spells.

Little Red Wagon Day March 30

When we hear that Earth "teems with life," our imaginations often conjure vast forests crawling with animals, oceans alive with fish, or blue skies filled with soaring birds. The primary engine of life, however, lies beneath our feet. Soil biodiversity-the vast mix of insects, worms, bacteria, fungi, and other living organisms in the dirt-regulates and balances the nutrients that allow for life aboveground. The longer soil remains undisturbed, the longer its organisms grow and thrive. Healthy soils are fertile, filter and store water, and resist erosion. Soil provides the foundation for all living things.

It is amazing that life must begin so small and unnoticed before growing into towering redwoods and gargantuan blue whales. For life to flourish, Mother Earth does not have to work on her own. We can provide the building blocks that sustain woodlands and their wildlife right in our own backyards.

Life from the Ground Up

With the International Day of Forests on March 21 and World Wildlife Day on March 3, the month of March provides ample opportunities to reflect on the extraordinary diversity of life on our planet. Our planet nurtures and supports so much life, it's no wonder we call her "Mother Earth."

Compost can be added to nutrient-poor soils to increase soil biodiversity. The root systems of different plants support different organisms underground, so planting a wide variety of native flowers, grasses, shrubs, and trees also improves soil. Best of all, a wide variety of native plants also harbors life aboveground. Insects are attracted to native plants and trees. Birds and other animals are attracted to insects. Before you know it, a simple backyard garden has become a refuge for all sorts of local wildlife. Of course, life doesn't happen overnight. It can take years for a healthy soil community to grow, for native roots to take hold, for trees to mature, and for animals to discover their new sanctuary. Nature requires patience. Mother Earth has always played the long game.

History in Bloom

Shape Description auto

> On March 27, 1912, Mayor Yukio Ozaki of Tokyo gifted 3,020 cherry trees to Washington, D.C., as a gesture of friendship and cooperation between Japan and the United States. Over 100 years

later, Washington's Cherry Blossom Festival remains one of the capital's most beloved events, drawing over one million visitors each year.

The story of the cherry trees began in 1885 with author, geographer, and photographer Eliza Ruhamah Scidmore. Scidmore often accompanied her brother, a diplomat, on assignments to the Far East, enjoying access to parts of countries that ordinary travelers could only dream of. It was Scidmore who, upon her return to Washington D.C. from Japan, first floated the idea of planting cherry trees along the Potomac River. Scidmore's ideas were rebuffed, but she was persistent.

In 1909, Scidmore wrote a letter to the new first lady, Helen Herron Taft, informing the president's wife of her intention to raise money to purchase and donate cherry trees to the city. The first lady was more than receptive. As luck would have it, a Japanese delegation was present in Washington. Hearing of the plan, the delegates graciously offered 2,000 trees, which the first lady accepted. Unfortunately, these trees arrived in America infested with insects and parasites. All 2,000 had to be destroyed. The idea, however, did not die. Japanese officials announced that another 3,020 trees would be shipped to Washington.

It was on March 27 that First Lady Helen Taft and Viscountess Chinda, wife of the Japanese ambassador, planted the first two Yoshino cherry trees on the north bank of the Tidal Basin. Additional trees were planted around the Basin, in East Potomac Park, and at the White House. Many of the original trees, despite being over 150 years old, still bloom each year in Washington to the surprise and delight of botanists. The cherry trees are the most pampered in Washington, getting expert care from National Park Service horticulturalists. The tree crews are tending not only to the trees but also to American history.

Total Bummer

Whether you call it by its original name, the "Bum Bag," or its current name, the "Cross-Body Bag," this fabulous (and some would say unflattering) fashion accessory will forever be known as the fanny pack. Try one on for size on March 12, International Fanny Pack Day.

While some claim that Australian Melba Stone invented the first fanny pack in 1962. Ötzi the Iceman, the prehistoric human found packed in alpine ice, wore a belt pouch 5,000 years ago. Modern iterations of the leather fanny pack first emerged in the 1950s after World War II, when travelers wore them while skiing European peaks. But it wasn't until the 1980s and '90s that fanny packs, manufactured in outlandish neon synthetic fabric, hit peak popularity. Just as rapidly, though, they became the butt of jokes. To wear one was considered unspeakably nerdy. But all fashion is cyclical. As many '90s trends reemerge, so too does the fanny pack! Today, celebrities are spotted wearing versions manufactured by Louis Vuitton. Perhaps to avoid fashion faux pas of the past, these bags are not worn at the waist or fanny, but across the body. We are not fooled. They'll always be fanny packs to us.

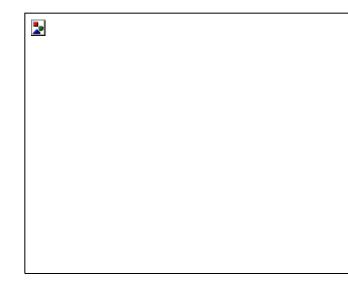

Awe-Inspiring

How does one even begin to celebrate International Day of Awesomeness on March 10? This holiday's founders selected the date because it corresponds with the birthday of actor and

martial artist Chuck Norris. Are we to believe that Mr. Norris embodies all the essential qualities of awesomeness? Norris has certainly achieved cult status amongst his fans thanks to his tough-guy persona. Perhaps Norris embodies the true meaning of *awe*, defined as a "feeling of reverential respect mixed with fear or wonder." Psychologists believe that experiencing true awe is healthy. These experiences enhance well-being and make us more altruistic.

Valentine's Day

Don and Geri take a moment to say Cheese to the camera!

2			

Georgia, Dick, Patsy, Francisca, and Don all smiles with all the love going on!

2.

Author of the Month

This month's author is Frank McCourt, who was an Irish American teacher and writer. He is best known for his book Angela's Ashes, a memoir of his childhood days.

Our second author is K.D McCrite, who has worked as a librarian and as a mental health case worker. She is best known for her books: Chocolate-Covered Baloney and In Front of God and Everybody.

Please go down by the Dining Hall and check out our Library!

Please also remember to <u>Return</u> all library books to their rightful places.

Here's to the Day of LOVE

2

Bill and Doyne enjoying each other's company!

A huge Thank You to the Huixqui Sisters for performing for Our Lady of Mercy!
